

STEP 1

Eyelet diameter
must be at least
8 times line diameter.

Wrap stranded cable twice around eyelet and lay end back against the cable.

STEP 2

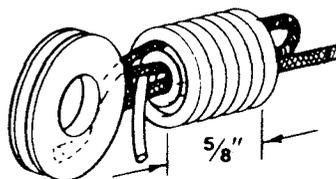

Soft wire

Start wrapping here.

Insert soft wire near eyelet, wrap this wire around cable out from the eyelet.

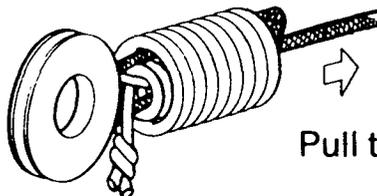

STEP 3

5/8"

Fold end of cable back over wrapped portion, wrap soft wire toward eyelet, and twist ends of soft wire together.

STEP 4

Pull tight.
